

FIBER DRIVER

The Jameson Fiber Driver, featuring a standard 12.7mm duct or 1in adapter, revolutionizes final drop cable installations. Its ergonomic design and efficiency eliminate hand-over-hand processes, reducing cable buckling and saving significant installation time. The included Drive wheel and the Idle wheel are optimized for fiberglass reinforced Flat Drop optical cable .3" wide and will accommodate many cables of a similar size. The wheels are removable and serviceable. Contact Jameson for optimized rollers for your application. It enables direct reel installation, making it a quick and efficient alternative to traditional methods like pull-lines or fish tapes. The Jameson Fiber Driver is a valuable, streamlined solution for fiber installation projects.

- Pushes fiber optic cable up to 300'+ in less than 30 seconds
- Enhances comfort and reduces fatigue by eliminating manual hand-over-hand fiber threading.
- Allows for the loading or unloading of fiber mid-span
- Can be driven with any power drill
- Small and lightweight, easily fit in any standard toolbox or tool bag
- Hand-held, single user operation
- Capable of pulling fiber from a supported spool while pushing into the respective duct
- Functions in forward and reverse
- Indoor or outdoor applications
