

JCS Jacket Stripping Tools

- **Dual-edged blade** cleanly removes the jacket.
- **Heat-treated steel** prolongs the blade's life.
- **Knurled tool body** ensures a positive grip.
- **Color-coded guide sleeve** facilitates identification.

DESCRIPTION

Durable and ergonomically designed, JCS cable jacket strippers cleanly remove the jackets on hard-line trunk and distribution cables.

APPLICATIONS

JCS tools strip the jacket on 0.412" through 1.000" PIII, T10, TX10, MC2, and PB10 cables; 0.540", 0.715", and 0.860" CommScope® double-jacketed cables; CommScope 7mm, F320, and 0.500" through 1.125" QR hard-line cables; and Andrews CSA6 and CSA11 braid-replacement drop cables.

SPECIAL FEATURES

Dual-edged Steel Blades:

The JCS blade bites into and lifts the cable jacket with ease, cleanly removing the jacket without damaging the soft outer conductor. Made of heat-treated tool steel, the blade is easy to replace after a long life of sharpness.

JCS Jacket Stripping Tools

SPECIAL FEATURES *(continued)*

Knurled Tool Body:

The JCS tool body is anodized and sealed to protect it from the elements. On non-QR tools, the body's knurled gripping surface ensures a firm hold during the stripping operation.

Color-coded Guide Sleeves:

A plastic guide sleeve on non-QR tools keeps all metal surfaces away from the soft aluminum outer conductor. The guide sleeve is color-coded to match the corresponding Cable Prep brand SCT stripping/coring tool, thereby facilitating selection of the right tool for the application.

Patented Mandrel Pin:

A patented mandrel pin on QR tools protects the soft outer conductor during the jacket stripping operation.

ORDERING INFORMATION

Cable Size / Type	JCS Tool Part Number	Guide Sleeve Color	Replacement Blade Kit Part Number
.412 T10 & PIII	JCS-412	Light Blue	JSB-3011
.500 T10 & PIII	JCS-500	Yellow	JSB-3011
.625 T10 & PIII	JCS-625	Green	JSB-3011
