

## Spec Sheet

### **Specification Example**

Tug-Tape or pull tape shall be constructed of woven polyester fiber for strength and to reduce friction. The tape must be (1/2 inches, 5/8 inches, 3/4 inches) in width, white in color, with black print. Printed tape to include trade name as well as sequential footage measurements.

Tug-Tape must have minimum tensile strength of (1800 pounds 1/2 inch / 2600 pounds 5/8 inch / 3300 pounds 3/4 inch) using ASTM test method D6775.

Elongation at break for Tug-Tape shall be less than (13.6% 1/2 inch / 13.1% 5/8 inch / 14% 3/4 inch) per ASTM test method D6775.

Tug-Tape shall have less than 6% thermal shrinkage per ASTM test method D4974.

#### **Unmatched Durability and Strength**

Our tape's smooth texture and low friction significantly reduce the risk of binding or tangling within the conduit, making your job more efficient and less time-consuming. The clearly marked footage measurements help with precise cutting and material tracking, optimizing your workflow and ensuring minimal waste.

#### **Material Specifications**

· Material: Woven Polyester Fiber

• Widths: 1/2" | 5/8" | 3/4"

Lengths: 1500' | 1800ft' | 3000ft' | 5000'

• Colors: Printed Black Footage Measurements on White Material

Tensile Strength	Test Method	Elongation at Break	Test Method
1/2": 1800 lbs	ASTM D6775	1/2": 13.6 %	ASTM D6775
5/8": 2600 lbs	ASTM D6775	5/8": 13.1 %	ASTM D6775
3/4": 3300 lbs	ASTM D6775	3/4": 14.0 %	<b>ASTM D6775</b>

# Thermal Shrinkage Test Method 1/2": < 6 %</td> ASTM D4974 5/8": < 6 %</td> ASTM D4974 3/4": < 6 %</td> ASTM D4974
